Veridia — Internship Hiring Platform

Submission Report for Veridia Internship

Deadline: October 20, 2025
Submitted by: Krishna Pandey
Internship Program: Veridia Internship Program
Repository Link: https://github.com/Krishna-7772/Veridia-Internship.git

Project Overview

Veridia is a single-page front-end web application designed as a complete internship application and management platform. It offers Applicant and HR views, supports multi-step forms, dashboards, and autosave features — all running entirely in the browser using localStorage.

Tech Stack Used

Technology	Purpose
HTML5	Structure and content
Tailwind CSS (CDN)	Styling, layout, and responsive design
Vanilla JavaScript (ES6)	Application logic, data management, and interactivity
LocalStorage	Mock backend for demo data and persistence

Key Features Implemented

Multi-step Application Form — includes validation, autosave, and resume upload.

Applicant Dashboard — displays user profile and application history.

HR Dashboard — supports filtering, sorting, pagination, and CSV export.

Email Templates — predefined templates for HR communication.

Simulated Backend — seeded demo data with `init_local_db()`.

UI Enhancements — responsive layout, modals, toasts, and gradient visuals.

Top Skills

JavaScript | React | Python | Node.js | Java | UI/UX

Average Time to Hire: 12 days

07 - Email Template Modal.

Suggested Improvements

• Integrate backend (Node.js / Firebase) for persistence.

• Implement secure authentication and role-based access control.

• Add email sending using SendGrid/Mailgun.

• Include automated testing and code linting.
